

# Won-Door FireGuard™ CrossCorridor | Horizontal Sliding Fire Door

The Won-Door FireGuard™ CC (CrossCorridor) fire door is specifically designed for applications that are up to 3.7m wide and up to 3m in height.

Unique features of this Fire Door include:

- **COST COMPETITIVE** - When compared to swinging fire doors on hold-opens, the Won-Door FireGuard™ CC door is a single source assembly that eliminates the expense and associated maintenance costs of metal frames, astragals, vertical rods, closers, magnetic hold-opens, kick plates, etc.
- **SMALLER STORAGE POCKETS** - Due to design improvements, the required storage pocket depths have been reduced by over 50%. A 2.5m wide Won-Door FireGuard™ CC door requires only a 432mm deep storage pocket. A traditional accordion fire door would require around 1m of pocket depth. That equates to re-claimed floor space for the designer.
- **INTEGRATED POCKET COVER DOOR** - The Won-Door FireGuard™ CC door incorporates a flat lead-post design with an integrated pocket cover door. The integrated pocket cover door is part of the assembly and covered by the U.L. label. This eliminates the expense of constructing and installing a non-labelled pocket cover door on site.
- **"GREEN" SELF-SUPPORTING TRACK SYSTEM** - The Integrated Self-Supporting (ISS) Track System eliminates the multiple layers of plywood and plasterboard found in conventional accordion fire door headers.

Other Points of interest:

- Fire Rating - up to 90 minutes
- Smoke Rating - available
- Access Control - available
- Vision Panel - available

Below is a link to a 2 minute video demonstrating this new and exciting product that opens up new possibilities in schools and hospitals etc.
